Services Brochure

## What We Do

Simply put, Wavetech offers technology services *to help you do what you do, better!* Here is a sampling of our regular services:

### Engineering and Consulting

- Process engineering and consulting
- Modeling and simulation
- Antennas and wireless communication and identification systems
- Vision systems

### System Integration

- Plant, DCS, SCADA, control & automation systems
- PLC/PAC programming
- Operator interfaces (HMI)
- Robotics and motion control
- PID loop tuning
- Panel design
- Software and control logic upgrades
- Remote access and control

### Custom Products and Services

- Embedded devices (microcontrollers, sensors, communication devices)
- Custom interfaces (touchscreens, control panels)
- Machine control

## What We Offer

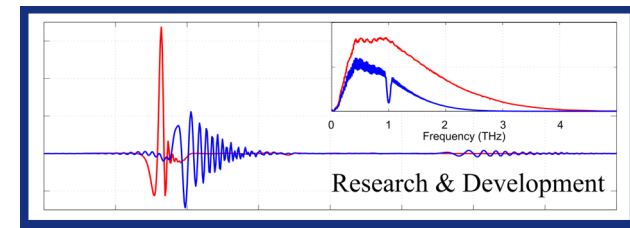

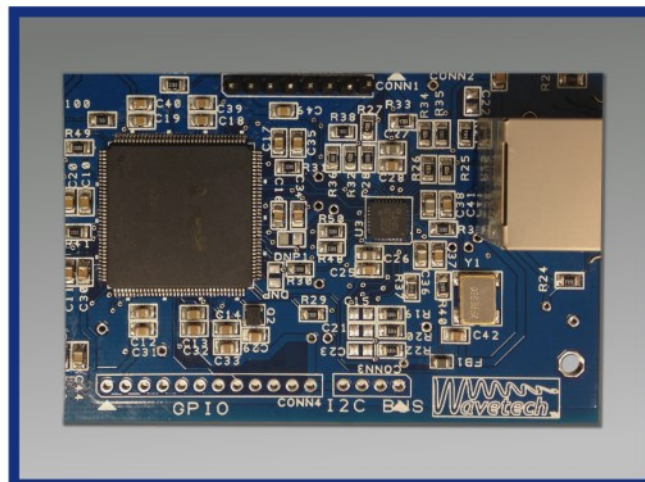

Wavetech specializes in integrating custom software and electronic controls with *any* other system. This includes other electronic modules, custom machines, and even whole manufacturing and processing plants. We provide the solution when it can't be found "off-the-shelf."

Our value includes:

- Full understanding of your needs. We aren't just programmers. We work hard to understand your goals and leverage our experience to *engineer* total solutions.
- Investment. Our success depends on your success.
- 20+ years of experience.
- Integrity. We price every job fairly and competitively and always go the extra mile.
- Worldwide service.

### Extra Value for You

Wavetech doesn't only serve others, we innovate! Our research and development continually builds intellectual capital that we apply to every job, providing unparalleled value to our customers.

## Who We Are

Wavetech was founded in 2011 and has been actively involved in research and engineering since.
